About This Game

Time in Time

Time in Time is a side scroller puzzle-platformer game where you control platforms and other functionals with timers. Each functional connected to a unique timer, basically functionals will run X seconds later after you spend X seconds on timers. You will start with specific seconds for each level and must spend your seconds wisely..

Time in Time is a hard game, you have to spend minimum amount of seconds and complete the levels under specific times to unlock next levels and achievements..

Time in Time includes level and shader editor integrated with Steam Workshop. You can create your own levels, customize shaders, add your own music and even sync shaders with your music..

Title: Time in Time
Genre: Indie, Strategy

A unique platformer with colorful graphics, also it has a workshop.. A simple and cheap little game that is good to spend a few hours with.

PROS:
The graphics are nice.
The music is old school but appealing enough.
The gameplay mechanichs are interesting

CONS:
The controls are a bit cluncky at first, they take a bit of time to get used to.. Simple idea turns into great mechanics.. a different platformer with great soundtrack.. double jump so so so so so so so soooooooooooooooooooooo anti-human .
I jumpppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppp WTF?
but ok nvm , I jumpppppppppppppppppppppppppppppppppppppppppppp.................... 10 min later .... ok my space bar broken.. A simple and cheap little game that is good to spend a few hours with.

PROS:
The graphics are nice.
The music is old school but appealing enough.
The gameplay mechanichs are interesting

CONS:
The controls are a bit cluncky at first, they take a bit of time to get used to.. increase the resolution and add more levels and it would be worth my time to play. The controls are really bad in my opinion. Simple idea turns into great mechanics.. a different platformer with great soundtrack.

I personally thought this games difficulty is more due to bad design, there is a reason why all achievements have only been accessed by such a small amount of owners of this game. The poor controls are also a major factor in this. Controls are also not even key bindable (to my knowledge). Double jump should never be holding space, I am amazed I have to say that.

I would also like to criticise the fact that the settings are not made available via the main menu and only via pausing the game, this was not known to me at first, and this was not helped by the fact that the music after only a few minutes was beginning to grate in my skull and that the graphics settings (also only accessible via main menu) decided to go on the highest possible setting by default, despite that causing a notable frame rate issue.

I only paid 20p for this game due to a coupon per badge crafting, and after maybe 10 minutes at most am personally in the mood to refund.

Maybe this game isn't meant for me, but I have a nagging feeling this game has flaws that need addressing.. I actualy got this game from a coopon for 30 cents and im prety satisfied.

Pros:
- Really cool looking.
- Colors and animations on the background match together so well.
- workshop included.
- 30 basic levels that are unique.

Cons:
- The SYSTEM REQUIREMENTS of the game are not that accurate
- Controls are kinda complicated and don't give the 100%

Hope i helped you !. Well,
Indie...Check
Nice value on STC...Check
Full controller support...Check
Eye strain because of lame graphics...Check
Difficulty...Eh
Fun...Sure
Workshop...Cool&Promosing

Conclusion,
Satisfy your need to kill some time when you are handling some other work and have some spare time.. increase the resolution and add more levels and it would be worth my time to play. The controls are really bad in my opinion. It's clever, but there is to much light pulsing on the screen, it gives an immidiate headache. You can't turn it off in the options because the menu is broken. I don't know what these guys where thinking about... It's like playing the rainbow road on Mario kart, but the entire game all the time... hurts your eyes and head, I really wanted to like this :(. Great and original platformer. Some people don't like the controls, but they are fine in my opinion. The game has good graphics, an easy to use level editor and even a shader editor! This is a fantastic game for the price.. double jump so so so so so so so sooooooooooooooooooooooo anti-human .
I jumppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppppp WTF?
but ok nvm , I jumpppppppppppppppppppppppppppppppppppppppppppppppp.................... 10 min later .... ok my space bar broken.. A unique platformer with colorful graphics, also it has a workshop.
